

Subliminal

**Most rappers deal with the subliminal
Wanna be criminals
For them being unoriginal is habitual
But our lyrics are clinical
Can be a vehicle to cleanse the spiritual
Apprehend the one-dimensional**

Too many rappers pick up the mic
with no insight
don't know where to begin to write
think their rhymes are in-flight and been tight
but they're so loose all they produce is a dim light
one dimensional
unexceptional
un-plentiful
and unacceptable
and susceptible to do more damage than the state correctional
and it's perpetual
radios play like it's a festival of vegetables hosted by the devil
celebrating being shot 41 times in your vestibule
can you imagine the bullets as they enter you?
yet your rhymes are still so questionable
are you just a fool?
cus the young are so impressionable
so what I say is not fashionable
just rational
flow is so logical
my articles will blow your whole style into particles
and we'll celebrate your fate having barbeques
where we harbor views
where robbers are slewed happily
and we'll have you there so hopefully you'll change your strategy
for it's a tragedy
they way you grab the mic and rip it so averagely
savagely damage the spirits that hang on to their sanity fragilely
and you're working with gravity
forcing down humanity
and you're mad at me
cus we plan to free
your fans from your fantasy

Apprehend the one-dimensional**

You're spitting blasphemy
at God's children haphazardly
spreading an allergy

where everyone is panicking
living frantically
practically
trying to purchase an identity
from worthless serpents
demonic servants
who search the earth surface
with the purpose of converting every person
to satanic worship
have a gigantic curtain
over the planet's hurtin'
as traditions are cursed
conditions worsen
so our mission is serving
original Hip Hop
with no criminal intention
no subliminal message
we're obvious with what we mention
liberation is our essence
no second guessing
just dispensing
rhymes with so much reflection and direction
we're making too many connections
to say our culture is not a weapon
Hip Hop that is truly addressing
the needs of the people
and what we're stressing

Cus of oppression
we spit with so much aggression
have intensive sessions
where we're pensive and cover extensive lessons
and come to the conclusion
that even with all their expensive weapons
the only solution
to improve our situation
is revolution
so fuck inclusion
if we all try and all die
it'll be an improvement
can you hear the cries
from the blood in my eyes?
we're not stuck on illusions
our death is an institution
backed by their constitution
so what we're doing
the style we're pursuing
making sensitive liberals even more apprehensive
as conservative find it even more offensive
but their intentions to censor this is senseless
slip right under their detections with a stealth projection
this is a form of health protection
for the uninsured from conception to death
to long after their resurrection
shit -- we know their transgressions

understand their deceptions
that's why we continue these transmissions to transform our conditions
and storm with no forgiveness
on the dawn of our resistance
the mourn of their destruction
we scorn at their corruption
telling the world how they were formed from hell's combustion
forcing you to rebel is our function
don't get sucked into suction
where your freedom is auctioned to elections
your thoughts of progression fall short to magicians
don't believe their superstitions
we've had enough of crucifixions
better believe we're coming with an unseen commitment
so we aint submitting
